UID EXPERIMENT -7

STUDENT PORTAL APP

AIM

To design multiple UI layouts for a student portal application and evaluate them based on aesthetics and usability using different color schemes and design styles.

TOOLS USED

- GIMP (for layout editing if used)
- Stitch (for UI generation and prototyping)

PROCEDURE

Step 1: Topic Selection

Selected **Student Portal Application** as the UI design topic.

Step 2: Creating Base Layout

- Designed a mobile login screen (1080 × 1920 resolution)
- Included:
    - Title and welcome message
    - Email/Student ID input field
    - Password field with visibility toggle
    - “Remember me” checkbox
    - Login button
    - Google/Facebook login options
    - Registration link

Step 3: Creating 3 Design Variations

- **Layout 1 – Light Academic Theme**

- Clean white/blue interface
- Professional and minimal design
- Clear typography and spacing
- Suitable for general academic use

- **Layout 2 – Dark Futuristic Theme**
  - Dark background with neon cyan accents
  - Styled like a “system interface” (Student_OS concept)
  - High visual impact and modern look

- **Layout 3 – (Your 3rd version if exists, or mention refined version)**
  - Balanced design with improved spacing
  - Better alignment and visual hierarchy
  - Combination of modern + usability

Student Cloud

STEP 4: USER FEEDBACK COLLECTION

Users were asked to evaluate based on:

- Visual Appeal
- Usability
- Readability
- Color Preference

USER FEEDBACK

Layout 1

- Simple and clean design
- Easy to understand
- Needs more visual appeal

Layout 2

- Very attractive and modern
- Unique design (liked by students)
- Slight readability issues due to dark theme

Layout 3

- Clean and well-structured
- Good balance between design and usability
- Preferred by most users

CONCLUSION

The experiment successfully demonstrated how different UI layouts and color schemes affect user perception.
